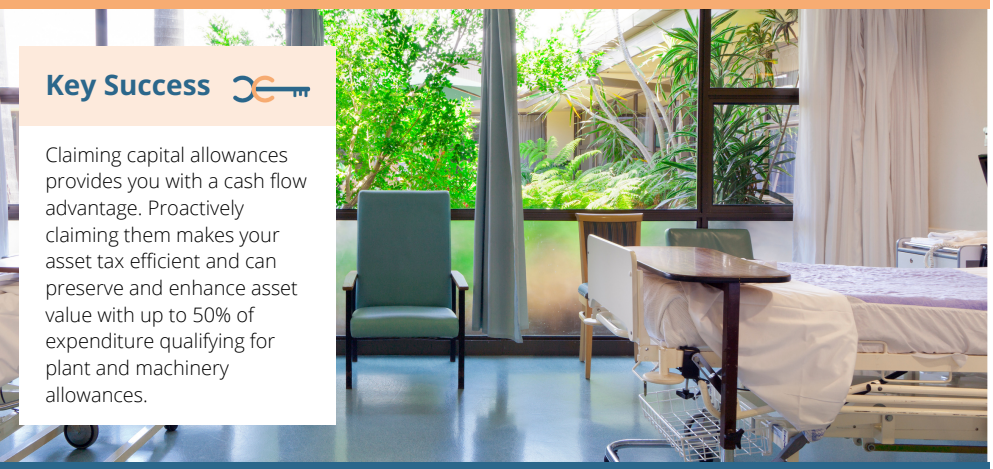
UNLOCKING PROPERTY TAX FOR THE HEALTHCARE SECTOR



Key Success

Claiming capital allowances provides you with a cash flow advantage. Proactively claiming them makes your asset tax efficient and can preserve and enhance asset value with up to 50% of expenditure qualifying for plant and machinery allowances.

When setting up your own healthcare practice, be it a GP surgery, dental surgery, veterinary surgery or physiotherapy practice, saving tax may not be high on your list of priorities. However, considering Capital allowances, a form of tax relief, may save you cash and provide you with a welcome cash flow advantage.

Capital allowances are treated like any other business expense, reducing your taxable profit within your accounting period, and are available for a number of UK based, privately owned healthcare properties. They provide tax relief on capital expenditure incurred on qualifying plant and machinery expenditure. The level of allowances that can be achieved will depend on the specification and the level of fit out of the property. Typical items include: room furniture, sanitary ware, carpets, reception desk, nurse call stations, kitchen, treatment room furniture, fire alarms, security installations, mechanical ventilations, electrical systems, lighting, heating, air conditioning, medical equipment telephone and data installations.

Whether you are building, buying, fitting out leased premises or refurbishing existing premises there are many opportunities for you to benefit from capital allowances. However, the earlier you consider the allowances in your property transaction the more likely your are to maximise the allowances available. This is especially true when purchasing premises to ensure changes in the legislation don't preclude you claiming on assets within the property.

Our processes look to enhance the level of capital allowances that may have already been claimed by your accountant. This normally relates to lump sum contractor stage payments for fit out or extension projects, to help identify items that are not easily identified within the invoices and sit within Land & Buildings on the Balance Sheet. Here, our survey and processes create the required information to maximise your Capital Allowances.

How Capital Allowances Add Value

For investors in Healthcare Sector, the main benefit of claiming capital allowances is that it may improve your cash flow. In addition, claiming and maximising capital allowances has secondary benefits for you including:

- Providing a means where the taxpayer has more working capital at their disposal;
- Making available more cash to pay lenders, therefore lowering the risk of the investment in the eyes of the lender;
- Giving the taxpayer the potential of using the available cash generated to make further investments, or improve other areas of the business;
- Provides an opportunity for investors to increase the return on their investment;
- In some circumstances, this can create a payable tax credit from HM Revenue and Customs.

For those developing Healthcare Properties as as stock in trade, the main benefit for considering capital allowances is not in terms of improving cash flow but in enhancing the property's saleability and potentially its value.

Key Actions

CAVETTA CONSULTING
Unlocking Capital Allowances

WHY CAVETTA CONSULTING

Helping you maximise your tax relief is how we add value for you. However, the full benefit of capital allowances advice is only realised when you, the tax payer, are proactive. At Cavetta Consulting, our directors have considerable experience advising businesses, property investors, landlords, and occupiers on all capital allowances implications that impact their business.

Traditionally, tax relief is perceived as the role of an accountant. However, like many elements of accountancy, tax has a number of sub-specialisms, including capital allowances. Therefore, your accountant may not have the time or resources to manage the expectation that capital allowances is only a tax issue. In reality, claiming capital allowances involves resolving tax, finance, legal, property, construction and valuation issues.

A capital allowances adviser has a different range of knowledge and skills from your accountant. This enables us to provide assistance to you in negotiations with HM Revenue and Customs; particularly when they are questioning valuation techniques and construction methodology and technology. Capital Allowances claims must be able to stand up to scrutiny. The figures need not only to be correct but also justifiable. This will ensure you have no further wide spread enquiries from HMRC.

We offer free advice to all businesses at the pre-planning stage of their business to make them aware of the benefits the tax system allows, as well as a free, no obligation review of completed or potential schemes in order to determine whether a viable claim for property tax reliefs can be claimed.

Our fee structure is tailored to take account of the tax status of the individual or business and is designed to add value to your business. And we never under take a valuation if your accountant could make the claim or we can't add value.

Types of Allowances

Plant and Machinery Allowances

These allowances are given for qualifying items that are used in the course of a claimant's trade or profession. Allowances are given at 6% for assets that are deemed to be an integral part of the building and 18% for other qualifying items.

Annual Investment Allowance

For all qualifying business expenditure incurred, the Government provides an Annual Investment Allowance, which gives 100% relief for the first £1million of qualifying expenditure, providing a significant cash flow benefit.

Full Expensing

For UK companies only, the Government provides an unlimited, 100% first-year allowance, allowing a full deduction from taxable profits in the year that the expenditure is incurred. The expenditure must be incurred on or after 1 April 2023 but before 1 April 2026 and must be on new and unused assets. It must not have been bought to lease, (although corporate landlords may benefit in respect of background plant and machinery in a leased property).

Structures & Buildings Allowance

This allowance applies to contracts for construction or purchases entered into on or after 29 October 2018. It provides a 3% flat rate relief of the qualifying items eg roof, walls, doors, on a straight-line basis over 33 years.

Land Remediation Expenditure

This relief aims to remove the cost barriers associated with remediating contamination from land and buildings by giving a 150% deduction for qualifying expenditure for UK companies.

Repairs and Maintenance

A 100% tax deduction is available on certain refurbishment or maintenance costs deemed to be repairs and not improvements. It is important to note the changes to the rules in 2008 regarding the repair of integral features.

WHAT OUR CLIENTS SAY: Kelly Kane Goodfellow, Practice Manager, Sloan Dental Limited

Alan at Cavetta consulting helped me release over £50k of unclaimed allowances from some recent building work at my dental practice. The whole process was very straight forward and Alan was super efficient and easy to deal with. I will undoubtely be using and recommending him in the near future. Thank you to Alan for all your outstanding work.
